- Only skilled journeymen

Fabrication

- MIG and TIG welding
- In-house painting and oxidizing
- Steel welded table frames are standard
- Blanchard ground, nickel-flashed table tops

Progressive Automated Systems

Electrical

- Panel building
- Machine wiring
- On-site third party interfacing
- Ontario Hydro Inspected

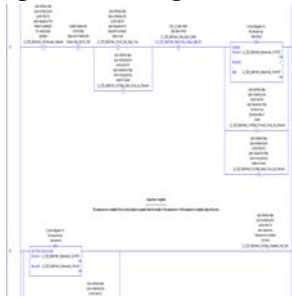

Assembly

- Complete in-house assembly
- Set-up and run of systems on our floor
- Installation and training provided by Certified Tradesman

Programming

- PLC
- Motion Control
- Vision Systems
- Robotic
- Third party interfacing
- Visual Basic
- Data Collection / DataPro
- On-site start-up and training

Service and Support

- We are here to support your system after installation
- Phone support
- Internet remote support
- On-site support

Future Plans

We plan for steady and conservative growth through the following:

- Controlled increase in sales
- Add capability and resources as driven by sales
- Establishing long term relationships with new and existing customers
- Provision of an enjoyable and rewarding environment for our employees
- Increase repeat orders from existing customer base

We plan to remain a committed company that accepts challenging and rewarding projects for our customers who want to deal with a friendly, efficient and capable company.

What makes us different from other automation companies?

- Open, honest, and active communication with the customer
- Carefully prepared, fair pricing agreements with clearly stated expectations
- A commitment to deliver customer systems within the specified timelines
- We strive for a positive attitude and approach to problem solving to ensure complete customer satisfaction
- A team approach to custom automation, empowering all employees to be involved and accountable
